[Credly Badge](#)

PROJECTS

Tweety Bird: The X-Scape

[Website](#) | [GitHub](#)

- Created a Flappy Bird clone using HTML, CSS & vanilla JS featuring jumping, gravity & collision detection
- Used localStorage for keeping track of high score
- Employed requestAnimationFrame provided by the Web API for smooth animations
- Implemented deltaTime for frame rate consistency across screens with different refresh rates
- Optimized game for seamless performance across mobile browsers

Business Website for Carolinas Courier Services

[Website](#) | [GitHub](#)

- Used React to develop a fully responsive business website for a real local business, *Carolinas Courier Services*, ensuring seamless user experience across mobile, tablet, & desktop devices
- Integrated the Google Maps API to implement address autocomplete & built a dynamic quote request form
- Automated client communications by integrating the EmailJS API, streamlining email notifications
- Implemented dynamic scheduling validation using the SweetAlert library to prevent booking conflicts

Human Rights First

[GitHub](#)

- Designed elements & visual assets, optimizing color schemes & enhancing typography to match the aesthetic language
- Integrated two API endpoints, merging their responses to feed data visualization modules, replacing placeholder data
- Built a protected page by integrating the app with a complete authentication microservice (Auth0) from start to finish

Protected Jokes

[GitHub](#)

- Configured a relational SQL database using Knex.js, setting up migrations & seeds
- Initialized an Express server using CORS, Helmet, & error-handling middleware to enhance security & reliability
- Built middleware for user input validation & database operations, ensuring data integrity & efficient query handling
- Implemented JSON Web Tokens for secure client authentication by building restricting middleware & an auth router
- Created comprehensive backend tests using Jest & Supertest to validate CRUD operations

EXPERIENCE

Regional Chairman, Charlotte, NC - Armenian National Committee of America

Sep 2022 - present

- Defend the Armenian Cause on Capitol Hill in meetings with Members of Congress, resulting in cosponsorships by North Carolina lawmakers on key legislation in the House & the Senate
- Organize events at the Armenian Church of Charlotte with participants such as Congressman Jeff Jackson
- Meet with mayors of the largest cities in NC, including Charlotte, & achieve formal reconciliation with the diaspora communities by 3 mayoral offices for proclamations hurting Armenian human rights priorities
- Advocate at the local, state, & federal levels for the humanitarian impact of the Artsakh/Nagorno-Karabakh War

Restaurant Tech Manager, Charlotte, NC - Ararat17

Mar 2020 - Feb 2022

- Leveraged technology to optimize iPad ordering, electronic inventory & POS integration resulting in a 10% (\$3k) decrease in monthly costs
- Managed & optimized integrated audio systems & kitchen display networks, ensuring seamless synchronization & operational efficiency in a high-demand restaurant environment
- Authored the official menu & business card designs, & managed social media, including targeted Facebook ads, to enhance business awareness & brand
- Ensured adherence to Health Department mandates & enforced food safety protocols

EDUCATION

BloomTech, Graduate of the Full Stack Web Development Program

Feb 2024

University of California, Los Angeles (UCLA), Bachelor of Science Degree in Neuroscience (3.67 GPA)

Aug 2021
