

Art Vardanyan

Full Stack Engineer | AWS Cloud & AI/ML

Charlotte, NC | 704.657.0704 | a.vardanyan.v@gmail.com | [Portfolio Website](#) | [GitHub](#) | [LinkedIn](#)

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React

Backend: Node, Python, Express, SQL, Authentication/Authorization (Express Session, JWT, Auth0, OAuth)

Cloud & DevOps: AWS Lambda, DynamoDB, S3, SQS, API Gateway, EventBridge, IAM, VPC, AWS SAM

AI/ML: LangChain, RAG, Agentic Workflows, LLM Evaluation, Data Annotation & Labeling (Labelbox), Amazon Bedrock, Amazon SageMaker, Model Training & Evaluation, Prompt Engineering

CERTIFICATIONS

AWS Certified Machine Learning – Specialty

[Credly Badge](#)

AWS Certified Solutions Architect – Associate

[Credly Badge](#)

AWS Certified AI Practitioner – Foundational

[Credly Badge](#)

PROJECTS

Manufactured Consensus in Online Attention Markets – Research Contributor

(Python, Google Colab, LangChain, Labelbox, YouTube Data API, LLM Evaluation)

- Labeled a golden dataset of coordinated vs. organic comment clusters in Labelbox, following annotation guidelines & documenting edge cases to support a PhD-led study
- Participated in inter-annotator agreement & calibration sessions to improve labeling consistency, helping produce the ground-truth set used to train & evaluate the coordination classifier
- Reviewed LLM-generated coordination classifications from a LangChain pipeline (entity extraction → timing analysis → similarity scoring → classification), providing structured scoring & flagging cases where the model failed
- Collected videos, comment threads, & engagement metadata via the YouTube Data API, organizing the raw data into a structured dataset for annotation & analysis

Dump Truck Logistics Platform – (React, OpenCV, Lambda, DynamoDB, S3, EventBridge, SQS, Textract, Google APIs)

[Website](#) | [GitHub](#)

- Architected an event-driven serverless AWS pipeline using Lambda, DynamoDB, S3, SQS, API Gateway, & EventBridge to automate OCR-based trucking ticket processing
- Built OCR-driven document scanning & extraction system using OpenCV, image preprocessing, & Amazon Textract for ticket validation
- Designed React-based operations dashboard supporting real-time ticket review, invoice management, & driver workflows
- Integrated Google Sheets, Apps Script, & Google Drive APIs to support legacy spreadsheet-based bookkeeping & automate invoicing
- Leveraged asynchronous SQS-based workflows to improve reliability, scalability, & fault tolerance during ticket processing
- Engineered idempotent event-driven workflows, transactional DynamoDB operations, & JWT-based authentication across distributed AWS services

Business Website for Carolinas Courier Services – (HTML, CSS, React, Google Maps API, EmailJS)

[Website](#) | [GitHub](#)

- Developed a fully responsive React business website for Carolinas Courier Services with multi-device support
- Integrated the Google Maps API to implement address autocomplete & built a dynamic quote request form
- Automated client communications by connecting the EmailJS API, streamlining email notifications
- Engineered dynamic scheduling validation using the SweetAlert library to prevent booking conflicts

Tweety Bird: The X-Scape – (Vanilla JS)

[Website](#) | [GitHub](#)

- Created a browser Flappy Bird clone using vanilla JavaScript with custom physics, collision detection, & frame-rate independent animation
- Used localStorage to persist high scores
- Employed requestAnimationFrame for smooth animations
- Implemented deltaTime for frame rate consistency across screens with different refresh rates
- Optimized game for seamless performance across mobile browsers

EXPERIENCE

Operations & Technology Manager, Charlotte, NC - Carolinas Courier Services

Mar 2022 - present

- Developed AWS-based ticket-processing pipeline to digitize paper-based driver workflows & streamline invoice generation
- Created the company's first customer-facing website, improving digital business presence
- Designed Google Sheets/App Script systems for bookkeeping, financial tracking, & IRS reporting processes
- Managed day-to-day operations including dispatching, payroll, invoicing, & financial oversight for an active trucking crew

Restaurant Tech Manager, Charlotte, NC - Ararat17

Mar 2020 - Feb 2022

- Leveraged technology to optimize iPad ordering, electronic inventory & POS integration
- Built & managed kitchen display system for synchronization & operational efficiency in a fast-paced restaurant environment
- Authored the official menu & business card designs, & managed social media, including targeted Facebook ads
- Ensured adherence to Health Department mandates & enforced food safety protocols

LEADERSHIP

Regional Chairman, Charlotte, NC - Armenian National Committee of America

Sep 2022 - Sep 2023

- Led regional advocacy with congressional & mayoral offices, & policymakers on Capitol Hill & across North Carolina
- Organized public events & stakeholder outreach efforts involving elected officials & community leaders

EDUCATION

BloomTech, Graduate of the Full Stack Web Development Program

Feb 2024

University of California, Los Angeles (UCLA), Bachelor of Science Degree in Neuroscience (3.67 GPA)

Aug 2021
